

Seminars in Advanced Silviculture

CFR 526 Winter Quarter 2012

Friday 2:30-4:20. Anderson 22,
School of Environmental and Forest Sciences, University of Washington..

- 6 January **Organizational meeting for registered and potential students**
- 13 January **System for advanced biofuels production from woody biomass in the Pacific North West**
Rick Gustafson, UW School of Environmental and Forest Sciences
- 20 January **Current extraction and utilization of forest biomass**
Bill Hermann, Hermann Brothers Logging and Construction
- 27 January **The Washington biomass supply assessment project**
John Perez-Garcia, UW School of Environmental and Forest Sciences
- 3 February **Sustainable production of biofuel feedstock by silvicultural design vs. foraging for scraps**
Doug Maguire, Oregon State University
- 10 February **To be announced**
- 17 February **Comparative physiology of Douglas-fir and western hemlock**
Rick Meinzer, USDA Forest Service
- 24 February **Growth and regeneration of western red cedar in coastal old-growth forests**
Lori Daniels, University of British Columbia
- 2 March **No Seminar.** *Silviculture Challenge, UW SEFS vs. UBC Forestry*
- 9 March **Eco-physiology applications in hemlock forest management decision making.**
Al Mitchel, Canadian Forest Service
